Bamboo Knitting Needles Takumi®

The art born from combining the finest raw materials and Clover's unmatched manufacturing technology.

Each and every one of these high quality bamboo knitting needles has been created utilising the properties of the finest natural materials.

Takumi, where art meets both science and technology to fashion the world's finest knitting instruments. Clover has long prided itself in the production of Takumi premium bamboo knitting needles. Production quantity has always been secondary to production quality. Only the finest raw materials are ever used and manufacturing has always been accomplished to the absolute highest, most exacting standards. The finely finished bamboo surface favors speed without the attendant concerns for dropped stitches. The comfortable, luxurious feel of the warmed bamboo combined with the technologically advanced design of precision points, cords and connectors have made them the ultimate knitting needle.

Takumi's supreme quality also comes from Clover's excellent manufacturing technology

- **Excellent durability**

Takumi select bamboo has a natural durability that improves their function with use and imbues them with heirloom quality for years of service.

- **Precision Tips**

Newly designed fine tips allow easy manipulation of even the finest yarns and virtually all knitting techniques.

- **Connecting Cords**

- Utilizing new materials, Takumi connecting cords are smooth, soft and strong. This allows knitted fabric to lie smoothly between knitting needles when working.

- **Smooth surface finish**

The unique bamboo surface allows smooth, fast knitting while maintaining easy control of stitches.

Only select bamboo becomes Takumi®

- Sustainability - Bamboo is one of the most renewable resources on earth. Harvested areas are quickly replenished providing an unending supply of quality materials to select from.
- Bamboo knitting needles have a warm, organic feel with just the right amount of flex to make them comfortable. To produce that level of performance only the most select raw materials can be used. Takumi bamboo is harvested at the optimum age to ensure durability. It is harvested in locations without significant snowfall to ensure uniformity of fiber. It is harvested at the time of year to ensure compact fiber structure. Bamboo science.

- We do not use bamboo nodes (joints) or the pieces, adjacent to nodes because those woody fibers are not straight enough.

- We use only those bamboo sections between nodes (internodes) that have adequate density.

- We cut and discard the bent portions, shoots and roots of bamboo trees.

- In order to make sure that materials do not shrink when they are dried, we use only the portion near the outer surface, where wood fiber texture is firm and tight.

Bamboo Knitting Needles Takumi®

Bamboo Knitting Needles "Takumi®" Single Pointed

- The newly designed precision tips on Takumi circular knitting needles accommodate the finest yarns and virtually any knitting technique.
- The newly designed connecting cords are smooth and soft, lying flat as you knit.
- The connection between the cord and the knitting needle are seamless allowing the smooth glide of yarn from one surface to the other.

Crochet Hooks

Amour Crochet Hooks

Amour crochet hooks are so comfortable to use that you won't want to stop.

With a soft, ergonomic handle and an ultra-smooth hook and shaft, crochet is always smooth and even.

Why Amour crochet hooks are the best choice:

Carefully designed hook

Easy to pull the yarn through the stitches and the stitches stay on the hook

Stitches don't slip off the hook making it easy to pick up stitches and pull the yarn through the stitches.

It is designed to make basic crocheting smooth and accurate.

<When picking up stitches>

The small hook passes through the stitches easily

<When pulling the yarn through the stitches>

The deep hook holds the yarn securely

Hand-friendly grip

3D design achieves an easy grip

Grips with a 3D curve fit your fingertips comfortably. These perfectly fitting handles require no extra power, allowing you to knit tirelessly.

3D curve that takes into account how fingers are placed

Soft and nonslip material

The entire grip is made of nonslip material to serve many different crocheting styles. It has a comfortable and soft touch.

Crochet Hooks

Why Amour crochet hooks are the best choice:

1. Easy-to-Use Crochet Hook

The hook is designed to prevent thread from slipping, and making picking up and pulling through of stitches easier.

3. Soft, non-slip material is easy to grip reducing hand fatigue.

The three-dimensional curves on the grip fit your fingertips naturally. This naturally fitting design prevents you from gripping the needle unnecessarily tightly, stopping your hand from getting tired easily.

2. Beautiful even stitches because of long, uniform diameter shafts.

Beautifully aligned stitches

Uniform thickness of the wider part of the shaft will keep the stitches neatly aligned.

Neat and beautiful even with many yarn overs

Stitches with many yarn overs can be made beautifully as well.

Uniform shaft

Fun & Fast, Crocheting in the Round! Simply work in the round using the 2 hooks and alternating the 2 yarns.

• Example of circular knitting

Simply work in rounds in a spiral using the two hooks and alternating the two yarns. It's easy to use and you can knit non-stop.

Use two yarns and knit alternatively. The crocheted fabric is circular.

1 Pick up the stitch (the warp yarn of the preceding row or the back bump of chain stitch) with the left hook.

2 Use the right hook to stitch the other yarn and continue.

Enjoy different designs by combining yarns of different colours.

Plain Tunisian stitch

• Example of flat knitting

1 Pick up the stitch (the warp yarn of the preceding row or the back bump of chain stitch) with the left hook.

2 Shift the crocheted fabric from left hand to right hand and continue.

Repeat **1** and **2**.

Black Gold Needles

Professional-type polished needles with special black plating

The surface is polished lengthwise.

The special black plating on the surface allows the needle to pierce effortlessly through fabric, enabling sewing with little resistance.

Simplified cross-section

Major reduction in frictional resistance (Clover comparison)

(Comparison of average values)

Outstanding rust resistance

The special black plating makes Clover needles highly rust-resistant, offering even better rust resistance than conventional nickel plating (Clover comparison).

[Corrosion resistance test]

An endurance test that exposes needles to high-concentration salt water vapor under harsh environmental conditions to promote rust formation.

*Unplated

Bend-resistant, break-resistant shaft

The needle shaft is strengthened by making it of carefully selected high-quality steel, quenched and tempered to maximise its material characteristics.

Designed for the optimum balance of hardness and elasticity.

To maintain standards compliance and quality, Clover carries out ongoing destructive testing by subjecting needles to loads.

Marking Tools

A powder chalk which allows you to mark fabric as if you are drawing with a pen

A powder-based chalk for drawing thin, beautiful lines. With its pen-like use, you can make marks as if you are drawing freehand.

Features of Chaco Liner Pen Style

Length, thickness and angle that are easy to hold

The length and thickness have been designed to achieve the pen-like ease-of-use.

Also, the chalk can be easily turned around to draw both straight and curved lines freely as it supports many different angles.

Marks can be easily made along the ruler

You can draw beautiful lines along the ruler with the pointed tip.

The amount of remaining powder is visible

You can see how much powder you have left through the transparent case.

Save time on refilling by exchanging the cartridge

Powder can be refilled easily by simply exchanging the cartridge.

When refilling, the powder will hardly spill over or dirty your hand.

Cross section

Plate spring

The powder comes out when the gear tooth is rolled on fabrics due to the vibration from the plate spring.

Smooth touch

The shape of the sharp gear tooth, inner parts and powder components were carefully reviewed to achieve a smooth touch.

| 7812 | |
| Roll & Press | |
|  | |
| 1 pc./pack | 3 packs/box |
| Package Size | 20 x 14 x 4.5 in |

Roll to press a seam or fold, either straight, curved or paper pieced seams.

Convenient in these situations too!

- For laminates and other fabrics that cannot be ironed
- For foundation piecing (paper piecing) and machine piecing
- For making a crease before ironing

• Crease fabric

• Fold seam allowance
• Open seam allowance

Fabric and hand-friendly.

A roller that glides smoothly

- Doesn't pull or distort fabric
- Allows you to press fabrics along straight or curved lines

Quick, portable, ergonomic

- Can be held in most comfortable position - left or right handed
- Just a little downward force is all that is needed for significant pressing action.

Press small areas with accuracy

- The roller's slight arc allows you to focus pressure on precise areas
- Roller edges will not leave creases on the fabric

The sheet of fine mesh is useful for transferring quilt lines and appliqué design layouts. By using the mesh you don't have to cut out the shape you want to use and trace around.

How to use:

- (1) Place the mesh sheet over the design you wish to use.
- (2) Using a ballpoint pen or colored pen trace the design for a permanent pattern.
- (3) Place the mesh with design marked on it over your fabric.
- (4) Using Clover's Water Erasable Markers or Chacopel Fine pencils to trace over the design you have marked on your mesh sheet.

For holding fabrics temporarily in place

Maintains the original feel of the fabric and needles will pass through smoothly.

Straight slash cutting

Curved slash cutting

*This cutter only supports Clover's replacement rotary blades.

Quilting method with beautiful layers of color and soft texture

Making slash quilting fun, beautiful and easy.

Slash quilting is a method of quilting. In this method, multiple layers of fabric are arranged on top of a base fabric and are sewn parallel to the true bias direction. Then, seams of all layers but the bottom layer are cut through and washed, and the fabric of the openings is raised.

Slash quilting is known for its beautiful layers of color and soft texture.

Slash quilting can be done easily and quickly with Clover's Slash Cutter.

Features of Clover Slash Cutter

The ratchet mechanism to firmly fix the blade in place

The ratchet mechanism to prevent the blade from rotating when it is being pushed. As the blade doesn't rotate, the fabric won't get caught in between the blade and the guide, allowing for smooth cutting of several layers of fabric.

16-step pitch feeding to maintain cutting quality

Turn 1 pitch once the blade becomes dull to improve cutting quality. It is designed so that it is easy to tell when to replace the blade.

The cutter comes with a guides for both straight/curved

It works with both types of slash quilts by switching the interchangeable guides. Both for stitching intervals wider than 6mm.

Insert into a channel between two stitching lines and push forward.

Fabric will be cut as you push the cutter forward.

<Basic technique of slash quilting and how to use a Slash Cutter>

1. Layer pieces of fabric so that the fabric grain is aligned.
Select a piece of fabric that has a surface which raises easily as the middle layer, and place a larger piece of fabric as the bottom layer for easy cutting.
2. With a sewing machine, make seams with a fixed width in the true bias direction (in a 45 degree angle to the fabric grain).
3. Insert the Slash Cutter guide in between the seams.
(Place the guide on top of the bottom layer.)
4. Hold the fabric down with one hand and push the Slash Cutter forward to cut.
(Make a cut with scissors if it is hard to cut at the beginning)
5. Once all the cutting is done, wash with a washing machine and raise fabric.
Dry and add the finishing touches to complete.

Scissors

Bordeaux Ultimate Scissors/Shears

Innovative technique ensures a fine cut and unsurpassed durability.

These small, portable stainless-steel scissors can smoothly cut thick or multiple layers of fabric. With strong, durable blades and the soft-to-grip handle, the scissors ensures a fine cut.

Bordeaux

- **Sharpness and durability**

Sharpness and durability are achieved by precision grinding of high quality stainless steel. This allows us to cut thick, dense or multiple layers of fabric easily and with precision.

- **Easy-to-grip handle**

The easy-to-grip handle is designed to minimize the fatigue associated with numerous or long cuts. The handle is ambidextrous.

- **Durable blades**

Scissors with highly durable blades made of high-quality stainless steel treated with a hardening process.

"QUICK" Yo-Yo Makers

Quick and easy Yo-Yo Maker templates!

"QUICK" Yo-Yo Makers allow you to make evenly spaced stitches to create beautiful gathers. Fold the seam allowance, rounding off to make a nicely shaped yo-yo.

Place the fabric between the plates and cut off the seam allowance.

Stitch following the holes in the plates.

Remove the plates and gather the thread.

Gather tightly, knot the end and hide it by placing it inside.

Round off to a nice shape and voila!

Hair Pin Lace Tool

Easily braid scarves, chokers, stoles, and so on.

Change blade width with the pin position.

As the ends clip on and off:

You can quickly make long braids without any interruption.

With 3 pins:

Set a third pin in the middle for an even more beautiful braid. As there are holes in the pin, you can pass other threads through the braid while braiding. This lace tool can even be used for a variety of purposes, including connecting braids and make gathers.

How to use:

Make braids with single crochet stitches using a crochet hook.

After a length of braid has been made, put the second clip on upper end.

Remove the lower clip and slip the braid downward.

Replace lower clip, leaving some of the braid on the pins. Remove upper clip and continue braid making.

Beautiful Pom-Poms Made Easy

- Open two U-shaped arches together. Wrap a yarn around the arches.
- Follow the same steps with the other side arches. Close the arches. Cut the yarn with a sharp pair of scissors between the two U-shaped arches. Cut the yarn all the way around the circle.
- Take a strand of yarn, slide it through that same crack in which you cut the yarn, tie a knot, and pull it as tight as you can.

TOOL SCHOOL

with instructor Steve Butler

Clover has always prided itself in producing high quality sewing notions that are uniquely useful to our customers. We don't do gadgets. Unfortunately the market place is so full of choices that it is sometimes difficult to separate the wheat from the chaff. To that end we're proud to announce the formation of Clover Tool School. On a bi-monthly basis, or as suitable, Clover will publish an edition of Tool School that focuses on just one product.

Steve has taught numerous classes at all major sewing machine conventions, regional trade shows, International Quilt Market, various machine embroidery venues ”.
