**CLOVER MFG. CO.,LTD.**

Clover manufactures products that are safe and reliable from the customers' perspective, and which are also environmentally friendly.

### Clover's Quality Policy

- We maximize our corporate value by manufacturing products that satisfy and resonate with customers.
- We reflect customers' demands and expectations into product manufacturing.
- We actively respond to environmental issues under our motto of being a company that is friendly to people and the environment.

#### Our Symbol of Commitment to Quality

- Origin of our Clover Mark -

When Toshio Okada, the founder of Clover MFG. Co., Ltd., started to work for a needle wholesaler in Osaka at the age of 14, his mentor gave him a textbook on moral philosophy. As a bookmark for this book, Toshio used a clover leaf grown in his hometown. In 1925, he opened his own shop, and soon after World War II, began manufacturing products on a full scale to provide consumers with needles and sewing tools. That was when he decided to use the design of the clover leaf—sandwiched between the pages of a book he had when he left home—as a mark to assure product quality. Although needles are small items, they are essential to people's daily life, just like water and salt. The Clover Mark continues to represent the founder's philosophy of assuring quality and taking responsibility for even the smallest products the company offers.

#### Clover's environmental initiatives Obtained ISO 14001 certification

ISO 14001 certified  
Clover Mfg. Co., Ltd.  
Higashiosaka Office

Clover's Higashiosaka Office (including Osaka Factory and Central Distribution Center) acquired the international ISO 14001 environmental standard in 2000. The office acquired the certification again in June 2008 following its relocation and completion of the renewal procedure.

## Designed for Ultimate Knitting Comfort

*PRO “Takumi” is a series of products that achieves ultimate knitting comfort based on the Takumi line of bamboo knitting needles. Make your knitting life more delightful with PRO “Takumi.”*

### 1. Ideal Tapered Tips

Clover’s high quality bamboo processing technology has achieved the ideal tapered tips which easily pick up stitches and avoids splitting yarn.

### 2. Silky smooth surface without top coat

The careful polishing process creates a smooth surface and natural texture for an ideal glide without your work slipping out.

#### The engraved mark has been improved.

The engraving is now more subtly etched, resulting in a smoother surface that ensures uninterrupted yarn gliding.

### 3. Flexible and relaxed cord

The new and improved cord will not kink or twist.

### 4. Colour-coded tip \*1

Each cord size has a different colored tip, allowing for quick visual identification. The blend of aesthetics and practicality makes it visually appealing and useful.

\* The US 0-2 (2.00-2.75 mm) needle shafts are so thin that only metal fittings are used at the joints.

### 5. Seamless smooth joints

Seamless needle-to-cord joints for smooth gliding without snagging. By reducing the size of the metal component, you can feel the bamboo texture more.

The rich texture of bamboo that only Takumi can offer fits comfortably in your hand.

The stainless steel metal component is both durable and resistant to age-related deterioration.

### 6. Rotating cord \*2

Thanks to the rotating cord, it does not get twisted, allowing you to carry on knitting unhindered.

## What Makes Knitting Needles Easy to Knit With?

Unlike crochet hooks, which only use the hook part, straight needles utilize the entire needle when knitting. The key factors for smooth knitting are the needle tip, sliding of the needle shaft, and adherence to accurate standards.

### • Needle tip

The best needle tip has two features: it is easy to insert into stitches and is unlikely to split the yarn. If the needle tip is too sharp, it may be easy to insert into stitches, but it will also tend to split the yarn and hurt the knitter's fingers. Takumi achieves both of the positive features by rounding the tip in the manufacturing process.

Takumi's needle tip

### • Perfect sliding on the needle shaft

Smooth transfer of stitches from the needle tip to the shaft results in uniformly sized stitches and a beautiful fabric. Takumi utilizes the natural properties of bamboo by polishing it to create a needle surface that is both easy to hold and slide. Instead of applying a surface coating, polishing is used to create needles that continue to slide easily and smoothly over time.

Needle tip polishing process

### • Precision in Standards

To achieve a fabric with neatly aligned stitches, the thickness of the needle shaft must be precise and uniform. A needle too thin for the yarn yields stiff stitches, while one too thick results in coarse stitches. Takumi employs a unique manufacturing process to ensure a uniform shaft diameter.

# Bamboo Knitting Needles Takumi®

The art born from combining the finest raw materials and Clover's unmatched manufacturing technology.

*Each and every one of these high quality bamboo knitting needles has been created utilising the properties of the finest natural materials.*

Takumi Bamboo Knitting Needles have been created with Clover's long-nurtured manufacturing technology which maximizes the qualities of the finest natural bamboo to achieve even a smoother, heartfelt knitting experience. Their smooth surface and comfortable fitting are the result of Clover's consideration for knitters. You will still be able to find these needles comfortable even after long hours of knitting.

Feel and experience these knitting needles made of carefully selected natural bamboo.

*Takumi's supreme quality also comes from Clover's excellent manufacturing technology*

- Excellent durability**  
 Only the finest parts of natural bamboo are used for knitting needles that perform year after year
- Clover's original, ideally shaped needle tip.**  
 Takumi Needles are comfortable to hold and will keep your yarn from splitting.
- Uniform shaft**  
 These needles feature a special finish that make shafts even—promising neat stitches and finishing.
- Smooth surface finish**  
 The surface is carefully finished to fit your hand comfortably and to make sure that yarn glides smoothly along the needles.

## Bamboo that Becomes Takumi®

### Finest Top Quality Material

Bamboo is a strong, elastic and hardy fiber. Its smooth surface and comfortable fit are the most desirable for knitting needles. Only the most premium parts of the bamboo are used for the needles.

Place of origin is limited to cold areas with little snow.

Bamboo in cold areas with little snow is very resistant to bending making this bamboo most desirable for knitting needles.

Heavy snow conditions result in bent bamboo.

Appropriately aged Bamboo is selected.

Young bamboo less than 3 years old is too soft while bamboo older than 5 years is too fragile. 4 to 5 year old bamboo is the most durable bamboo to use.

Cutting period is limited to winter.

Bamboo in winter has less moisture and the fiber is more compact.

- We do not use bamboo nodes (joints) or the pieces, adjacent to nodes because those woody fibers are not straight enough.

- We use only those bamboo sections between nodes (internodes) that have adequate density.

- We cut and discard the bent portions, shoots and roots of bamboo trees.

- In order to make sure that materials do not shrink when they are dried, we use only the portion near the outer surface, where wood fiber texture is firm and tight.

### What is Different About the Bamboo Used for Takumi?

Takumi carefully selects and uses bamboo that is straight, dense in fibre, and resilient (bend-resistant), which is the optimum material for knitting needles. Takumi exclusively uses bamboo meeting strict standards; other materials can't endure Clover's unique process of sharpening needle tips and polishing for a glossy finish.

- **Bamboo grown in a cold region with little snow**

The fibres are tight and the bamboo is straight because it has not been bent by the weight of snow.

- **Bamboo aged four to five years old**

Younger bamboo is too soft and weak, while older bamboo has brittle fibres.

- **Harvesting is done only during winter**

Winter is drier and has less moisture, making the bamboo less prone to mold.

- **Only the part close to the bamboo bark, where the fibres are dense, is used**

### Fun & Fast, Crocheting in the Round! Simply work in the round using the 2 hooks and alternating the 2 yarns.

#### • Example of circular knitting

Simply work in rounds in a spiral using the two hooks and alternating the two yarns. It's easy to use and you can knit non-stop.

Use two yarns and knit alternatively. The crocheted fabric is circular.

1 Pick up the stitch (the warp yarn of the preceding row or the back bump of chain stitch) with the left hook.

2 Use the right hook to stitch the other yarn and continue.

Enjoy different designs by combining yarns of different colours.

Plain Tunisian stitch

#### • Example of flat knitting

1 Pick up the stitch (the warp yarn of the preceding row or the back bump of chain stitch) with the left hook.

2 Pull up the yarn through the stitches from the left to the right.

3 Repeat 1 and 2.

## Amour Crochet Hooks

*Amour Crochet Hooks are so comfortable to use that you won't want to stop.*

With a soft, ergonomic handle and an ultra-smooth hook and shaft, crochet is always smooth and even.

### Why Amour Crochet Hooks are the Best Choice:

- *Carefully designed hook*
- *Easy to pull the yarn through the stitches and the stitches stay on the hook*

Stitches don't slip off the hook making it easy to pick up stitches and pull the yarn through the stitches.

It is designed to make basic crocheting smooth and accurate.

<When picking up stitches>

The small hook passes through the stitches easily

<When pulling the yarn through the stitches>

The deep hook holds the yarn securely

- *Hand-friendly grip*
- *3D design achieves an easy grip*

Grips with a 3D curve fit your fingertips comfortably. These perfectly fitting handles require no extra power, allowing you to knit tirelessly.

- *Soft and nonslip material*

The entire grip is made of nonslip material to serve many different crocheting styles. It has a comfortable and soft touch.

## Why Amour Crochet Hooks are the best choice:

### 1. Easy-to-Use Crochet Hook

The hook is designed to prevent thread from slipping, and making picking up and pulling through of stitches easier.

### 2. Soft, non-slip material is easy to grip reducing hand fatigue.

The three-dimensional curves on the grip fit your fingertips naturally. This naturally fitting design prevents you from gripping the needle unnecessarily tightly, stopping your hand from getting tired easily.

### 3. Beautiful even stitches because of long, uniform diameter shafts.

Beautifully aligned stitches

Uniform thickness of the wider part of the shaft will keep the stitches neatly aligned.

Neat and beautiful even with many yarn overs

Stitches with many yarn overs can be made beautifully as well.

# Yarn Ball Winder

Smoothly wind balls of yarn with gentle effort

3205	
Yarn Ball Winder	
1 set/pack	1 pack/box
Package Size	6.77 x 6.3 x 5.59 in

Winding capacity: approx. 4.5 oz  
(for light knitting wool)

## Wind a substantial amount of yarn

The distance between the bobbin and the yarn guide has been designed to allow ample space for the winding of light knitting wool and ordinary skein (approx. 3.5 oz).

## Winds yarn efficiently

The bobbin turns 4.4 times for each rotation of the handle. This achieves efficient winding of balls of yarn with little movement.

## Handle can be turned with gentle effort

The long handle makes it easy to turn with gentle effort. The handle is oval-shaped for easy gripping. The clamp is equipped with thick rubber to hold the device firmly to the desk for stable winding.

Perfectly wound yarn!

# Black Gold Needles

## Needle Surface : Smooth and rust-resistant

### Polished along the needle shaft

Significantly less friction when compared to standard needles. (Clover comparison).

The surface is polished lengthwise.

### Special black plating

The special black plating provides outstanding rust resistance compared to conventional nickel plating. (Clover comparison).

## Needle Tip : Sharp and strong needle tip

Clover's unique polishing process. To strengthen the tip, the first 0.5 mm are polished to a cone shape.

## Needle Eye :

### Shaped for easy threading

Clover's original oval shape adds strength to the eye while lengthening it for easy threading.

### Gentle on threads

The needle eye is plated with pure gold. The characteristic softness of gold prevents the thread from fraying and breaking.

### Designed to pass smoothly through fabric

Grooved for smooth stitching through fabric.

## Needle Shaft : Bend and break-resistant

The needle shaft uses high-quality steel. Our quenching and tempering processes maximise the strength and elasticity characteristics for the optimum balance.

Multipurpose measuring tool for sewing, quilting, knitting, crochet and embroidery.

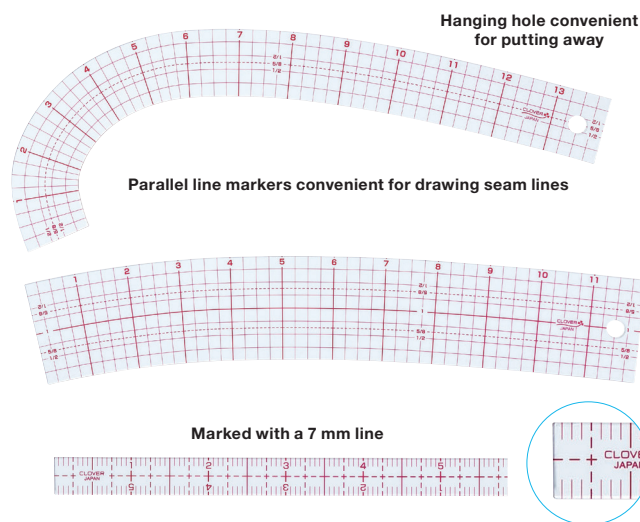

## A sewing ruler with adequate flexibility.

These rulers are perfect for sewing/knitting drafts or drawing seam lines.

Parallel lines can be drawn accurately at several distances.

The rulers are made of a flexible material to help measure curved portions.

You can clearly read scales even on dark-coloured fabrics and easily draw a true bias line with a 45° line.

**7006**  
**Curve Ruler with Mini Ruler**

1 set/pack	3 packs/box
Package Size 15.6 x 4.33 x 0.16 in	

Curves perfect for sewing

Deep curve  
For the neckline or armhole

Gentle curves  
For the hem and hip lines

The rulers come with a case.

**The compact, easy-to-use curve ruler with parallel lines is useful for marking seam allowances.**

These rulers are optimal for drawing curved lines when copying sewing patterns, creating drafts, or drawing curved seam lines quickly and neatly.

Parallel lines are marked along the edge of the curve, enabling the drawing of curved seam lines easily. This is a set of two curve rulers and a mini ruler (15 cm).

# Sewing & Patchwork Accessories

A stitch guide that can be aligned with the edge of the fabric for stitching.

9584	
Stitch Guide	
1 set/pack	3 packs/box
Package Size	7 x 3.7 x 0.47 in

**Note:**  
This guide is suitable for sewing machines of which gap between a needle clamp screw and a needle plate is higher than 8 mm.

**Comes with a position-adjusting plate!**  
Now the plate can be kept parallel and the guide can be positioned more easily with a hole for a sewing-machine needle.

If the stitch guide is aligned with the fabric before stitching with a sewing machine, a neat stitch with a consistent seam-width can be achieved.

The guide comes with an adhesive sheet that can adhere to both metal and plastic surfaces, enabling it to be fixed at any location.

**Stitching straight**

Use the long side of the guide.

**Stitching curves: Use the short side of the guide.**

Use both guides connected.

Inner curve

Outer curve

**Top Stitching:** place the guide in front of the presser foot and sew.

**Stitching Strips:** with two guides, you can sew strips neatly.

**Marks can be easily made along the ruler**  
You can draw beautiful lines along the ruler with the pointed tip.

**The amount of remaining powder in the pen is visible**  
You can see how much powder you have left through the transparent case.

**Save time on refilling by exchanging the cartridge**  
Powder can be refilled easily by simply exchanging the cartridge. When refilling, the powder will hardly spill over or dirty your hand.

**Smooth touch**  
The shape of the sharp gear tooth, inner parts and powder components were carefully reviewed to achieve a smooth touch.

### Easy to Replace!

Comfortable angles (angles that support different hands/situations)  
Approximately 65°  
Comfortable thickness (The shaft is 13.5 mm thick)

**Cross section**  
The powder comes out when the gear tooth is rolled on fabrics due to the vibration from the plate spring.

### Length, thickness and angle that are easy to hold

The length and thickness have been designed to achieve the pen-like ease-of-use.

Also, the chalk can be easily turned around to draw both straight and curved lines freely as it supports many different angles.

# Slash Cutter

Make beautiful slash quilts quickly!

499	
Slash Cutter	
1 set/pack	3 packs/box
Package Size	9.1 x 3.8 x 1.1 in

Comes with two interchangeable guides; for straight slash cutting and curved slash cutting. Designed with comfort and safety features!

\*This cutter only supports Clover's replacement blades.

Straight slash cutting      Curved slash cutting

## Quilting method with beautiful layers of colour and soft texture

*Making slash quilting fun, beautiful and easy.*

Slash quilting is a method of quilting. In this method, multiple layers of fabric are arranged on top of a base fabric and are sewn parallel to the true bias direction.

Then, seams of all layers but the bottom layer are cut through and washed, and the fabric of the openings is raised.

Slash quilting is known for its beautiful layers of colour and soft texture.

Slash quilting can be done easily and quickly with Clover's Slash Cutter.

Insert into a channel between two stitching lines and push forward.

Fabric will be cut as you push the cutter forward.

## Features of Clover Slash Cutter

*The ratchet mechanism to firmly fix the blade in place*

The ratchet mechanism to prevent the blade from rotating when it is being pushed.

As the blade doesn't rotate, the fabric won't get caught in between the blade and the guide, allowing for smooth cutting of several layers of fabric.

*16-step pitch feeding to maintain cutting quality*

Turn 1 pitch once the blade becomes dull to improve cutting quality.

It is designed so that it is easy to tell when to replace the blade.

*The cutter comes with a guides for both straight/curved*

It works with both types of slash quilts by switching the interchangeable guides.

Both for stitching intervals wider than 6 mm.

## Basic technique of slash quilting and how to use a Slash Cutter:

1. Layer pieces of fabric so that the fabric grain is aligned. Select a piece of fabric that has a surface which raises easily as the middle layer, and place a larger piece of fabric as the bottom layer for easy cutting.
2. With a sewing machine, make seams with a fixed width in the true bias direction (in a 45 degree angle to the fabric grain).
3. Insert the Slash Cutter guide in between the seams. (Place the guide on top of the bottom layer.)
4. Hold the fabric down with one hand and push the Slash Cutter forward to cut. (Make a cut with scissors if it is hard to cut at the beginning)
5. Once all the cutting is done, wash with a washing machine and raise fabric. Dry and add the finishing touches to complete.

# Fabric Tube Maker

Accomplishes two precision folds in one effortless motion.

The Fabric Tube Maker makes creating Jelly Roll® projects a breeze, by inserting fabric and batting strips through parts, which are then effortlessly pulled through the tube maker!

1 set/pack	3 packs/box
Package Size	5.31 x 2.36 x 1.34 in

Create jelly roll rugs, baskets, and more!

1. Place batting on top of wrong side of fabric.

2. Insert fabric and batting strips through part A. Place part B in fabric and batting and click into place with part A. Pull fabric and batting through parts A/B.

3. Insert folded fabric and batting strips into part C to fold again. Place part D on the top of the fabric and batting strips and click into with part C.

4. Pull the fabric and batting strips through parts C/D. Keep the position of paired units A/B and C/D close to the needle plate and slide along as you sew.

Pair parts A/B and C/D should be combined.

Made of durable and extremely smooth plastic material.

# Hair Pin Lace Tool

Easily braid scarves, chokers, stoles, and so on.

Change blade width with the pin position.

**3104**  
**Hair Pin Lace Tool**

1 set/pack	3 packs/box
Package Size	8.8 x 5.8 x 0.8 in

"Hair Pin Lace" is a traditional interwoven braid that can be made using a basic technique known as "single crochet".

Make braid widths: 2 - 8 cm. You can set every 1 cm.

**As the ends clip on and off:**  
 You can quickly make long braids without any interruption.

**How to use:**

Make braids with single crochet stitches using a crochet hook.

After a length of braid has been made, put the second clip on upper end.

Remove the lower clip and slip the braid downward.

Replace lower clip, leaving some of the braid on the pins. Remove upper clip and continue braid making.

**With 3 pins:**

Set a third pin in the middle for an even more beautiful braid.

As there are holes in the pin, you can pass other threads through the braid while braiding.

This lace tool can even be used for a variety of purposes, including connecting braids and make gathers.
